**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Murata (JP-405102228A). Murata teaches a method of stud bumping, comprising: providing a bonding head having a plurality of wire passages formed therein; disposing a plurality of wires through respective ones of the plurality of wire passages; providing a substrate having a plurality of bond pads; engaging the wires with respective ones of a first set of the bond pads; and forming a first set of stud bumps outwardly from respective ones of the first set of the bond pads (abstract and Figures); the wires are formed from a material selected from the group consisting of gold and aluminum (paragraph [0013] of the translation); causing the wire passages to resemble an array selected from the group consisting of a linear array and a rectangular array (Figures). Two points make a line and can be considered an array.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1725

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Murata (JP-405102228A) in view of Beaman et al. (US-20020190738A1). Murata teaches all of the limitations of the claims except the bonding head is formed from a ceramic.

Beaman et al. teaches the bonding head is formed from a ceramic. At the time of the invention it would have been obvious to one of ordinary skill in the art to combine the ceramic bonding head of Beaman et al. with the wire bump bonding apparatus of Murata in order to prevent sticking and to provide heat insulation.

### ***Allowable Subject Matter***

Claims 9-17 are allowed.

Claims 4-5 are 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art of record that is cited as of interest is presented on the form-892.
